OPPOSITION TO PROPOSED RULEMAKING

FCC MAIL ROOM

AND

PETITION FOR COUNTER-PROPOSED RULEMAKING

Comes now, Michael T. Mc Kenna, In Pro Per, and respectfully requests that the Commission dismiss or amend the proposed rule-making at Shingletown, California and accept this counter-proposed rulemaking request. The petitioner "Mc Kenna", requests that the Commission's Rules be amended to allot the following FM channel to the city of Dunsmuir, California and amend Section 73.202(b) as follows:

<u>CITY</u>	<u>EXISTING</u>	<u>PROPOSED ADDITIONAL</u>
Dunsmuir, California	261 C-3	231 C-3
Shingletown, California	287 C-2	NONE

In support whereof, the following is shown:

1. Mr. Mc Kenna through this counter-proposed rulemaking request, pleads that the Commission allot FM channel 231 C-3 to the community of Dunsmuir, California as that city's second FM radio service as opposed to the pending class 'A' allocation at Shingletown on channel 232 A.

2. The counter-proposed allocation of FM channel 231 C-3 is the more preferred allotment. While Dunsmuir is an incorporated city of 2,500 persons, Shingletown has only an estimated population of some 250 persons. Even if the Commission were to determine that both communities were of equal status in nature, the proposed allocation of a class 'C-3' at Dunsmuir should prevail over the allotment of a class 'A' channel to Shingletown.

3. Mr. Mc Kenna, through this petition for rulemaking, confirms his intention and willingness to apply to the Commission for use of the proposed channel at Dunsmuir, California, should the Commission allot FM channel 231 C-3 or other channel of equal class.

4. The attached frequency study confirms that the counter-proposed allotment meets the Commission's Rules and Regulations.

In conclusion, "Mc Kenna" respectfully requests that the Commission dismiss or amend the proposed rulemaking at Shingletown, California and accept this counter-proposed rulemaking to allocate FM channel 231 C-3 to Dunsmuir, California.

Respectfully submitted,

Michael T. Mc Kenna
